

Student Affairs Office (SAO) Organises Trip To Ostrich Farm & Port Dickson

On Saturday, 25th March 2006, a busload of students went on a trip to the Ostrich Farm and Port Dickson. The trip was organised by the Student Affairs Office. The journey to Negeri Sembilan took approximately an hour and a half.

Students were first provided with some background information on ostriches. They were then introduced to a monkey named Abu. Students took turns taking pictures with Abu and later they took a group photo.

After that, students were guided to the racing area to watch an ostrich race. Students cheered for the ostrich they supported. After the race, students got to ride the ostriches. Every student who rode on an ostrich received a certificate.

The next highlight was a baby crocodile. Students carried the baby crocodile and had their photos taken. Its jaws were secured and its eyes were covered when they carried it to prevent any untoward incidents. Students also had their pictures taken while they were riding a horse. The last stop was a crocodile-catching demonstration by three men.

At Port Dickson, the group was provided with lunch and mineral water. After lunch, the students began participating in various activities. Some rode on the banana boat while others played football and netball by the beach.

For those who did not join the activities under the sun, they spent time chit chatting and catching up on their reading in the cool of the shade. The rest were quite happy just sitting back, snacking on peanuts and chips, while enjoying the refreshing sea breeze and breath-taking scenery. Some of us enjoyed ourselves laughing at each other's antics. The whole trip went very well. We started packing and headed for home at 4.15pm. We reached UCSI Campus before 6pm.
