PROFILE

CryoCord Sdn. Bhd. was established early 2002 in answer to the call by the Ministry of Science, Technology and Environment of Malaysia for the research and development of science by local and foreign partnerships in the medical biotechnology sector, where there is a need for companies and institutions in both the public and private sectors to work together, especially in cutting-edge technology.

They are a medical biotechnology company specializing in Cord Blood Banking and Stem Cell Research, geared towards establishing itself in South East Asia. In addition, having been conferred MSC Status by the Multimedia Development Corporation, the collection and processing procedures are of the highest standard, and are in line with European standards on Cord Blood Banking. CryoCord Sdn. Bhd. is located within the Multimedia Super Corridor (MSC) at Century Square, Cyberjaya, a high-tech science and research based development center. CryoCord employs very stringent criteria set by the American Association of Blood Banks, and is in strict compliance with European standards on Cord Blood Banking and Stem Cell Research.
